

Expected Graduation: December 2026

Mengmeng Fang

Urbana, IL | (217) 390-7991 | [Email](#) | [LinkedIn](#) | [Portfolio](#) | [Github](#)

Education

University of Illinois Urbana-Champaign | M.S. in Computer Science | December 2026 | GPA: 4.0/4.0

University of California Davis | M.S. in Environmental Engineering | June 2016 | GPA: 3.764/4.0

Colorado State University | B.S. in Chemistry and B.S in Environmental Health | May 2014 | GPA: 3.885/4.0

Technical Skills

Programming: Python, JavaScript, Java, SQL, C, HTML/CSS

Frameworks & Development: React, Flask, Tailwind CSS

Databases: MySQL, MongoDB

Tools & Cloud: Git, Google Cloud, Vercel, Android Studio, MATLAB

Projects

Panda Family Explorer | React, JavaScript, Tailwind CSS, Vercel

Independent Project | Summer 2026

- Designed and built an interactive web application for exploring structured giant panda profiles and lineage data through search, profile cards, and family-tree navigation
- Developed reusable React components, dynamic search and filtering, and linked parent-offspring profiles to support intuitive exploration across interconnected data
- Transformed complex lineage data into an interactive family-tree experience, designing intuitive navigation flows and responsive UI states; independently deployed the application on Vercel

MealMate - Food Management Mobile App | Android, Java

University of Illinois Urbana-Champaign | Sep-Dec 2025

- Designed and developed an Android application for tracking food inventory and expiration dates, supported by a structured database of 100+ items across 10+ categories
- Designed a 3-step input workflow requiring under 5 seconds to add, update, or remove items, prioritizing low-friction user interaction
- Implemented multi-dimensional filtering by food type, storage location, and expiration status to help users quickly identify items requiring action

African Study Catalyst – Research Information Management System | PHP, JavaScript, SQL

Independent Project | May-Aug 2025

- Identified inefficiencies in spreadsheet-based research tracking and developed a centralized web application for managing publications, awards, and projects
- Designed advanced search and filtering by year and activity type, along with Excel export for downstream reporting
- Built interactive line and bar chart visualizations to help users analyze research activity and trends
- Reduced multi-step manual spreadsheet workflows to seconds, improving information retrieval and reporting efficiency by approximately 10×

Work Experience

International Career Navigator Coordinator

The Career Center, University of Illinois Urbana-Champaign | Aug 2026 – Present

- Lead and mentor a cohort of 6–9 International Career Navigators through biweekly 1:1 coaching, progress tracking, and individualized feedback
- Facilitate biweekly International Career Series workshops and support delivery of a 9-week professional development program for international students
- Coordinate Navigator training, orientation, and campus-wide career programming in collaboration with Career Center staff and student leaders

Air Quality Engineer

Monterey Bay Air Resources District | Monterey, CA | Dec 2016 – May 2020

- Developed data-driven tools to automate emissions calculations and reporting workflows, reducing repetitive manual analysis
- Analyzed complex technical and regulatory datasets to support engineering decisions and permit evaluations
- Collaborated with businesses, engineers, and regulatory stakeholders to translate technical requirements into actionable recommendations
